Approval Details:

WEFTEC 2023® has been approved in WV for both wastewater and water operators as follows:

CEH course numbers CEH2023-198 for drinking water, WW2023-196 for wastewater and WD2023-085 for well drillers. It was mentioned in the approval process that not all courses would apply to all of the above numbers as some courses are only related to wastewater and some only drinking water. So, attendees who submit documentation from this conference/expo will be reviewed on a case-by-case basis to determine whether their session will apply.
