Approval Details:

As of July 1, the board no longer needs to approve drinking water and wastewater courses. They now qualify for continuing education in Idaho if the subject is “germane to the profession.” Only courses for backflow assembly tester licensees must be approved by the board. They are also submitted through Online Services.

Licensees must still provide proof of their continuing education. When you provide certificates or transcripts, please ensure they include:

- Licensee’s name
- Course title(s)
- Date of completion
- Relevancy: drinking water (DW), wastewater (WW), drinking water and wastewater (DW/WW), or backflow assembly tester (BAT)
- Number of hours
